

ABOUT

Fullstack developer with 3+ years of experience.

I work at Korok Sistemas, a start up that works for automation and improvement of accounting processes. This project started as an application following the monolithic architecture (Node.js Back and JQuery Front) which soon created a body and several modules (currently there are 6). I work directly in the maintenance of the system and implementation of new features. I also exercise the role of project leader (organizing the Daily Meeting and sprints, creating backlogs, defining goals and objectives). Currently, the platform works with modern technologies, such as ReactJs, NodeJS, Typescript, Python, MongoDB, SQL Server, Kubernetes, Argo CD, Cypress and Github Actions. This is all using the microservices architecture.

EXPERIENCE

2019 - Present

Full Stack Developer

As a programmer at Korok I work with: developing new modules for the system, maintaining the entire application and managing the team of programmers in their daily tasks.

2018 - 2019

Project Manager

I manage the team of programmers in the development of the Korok application used by Contabilidade Bessa.

2017 - 2018

Owner of JS

Entrepreneurial experience I had where I put into practice my knowledge of management and decision making.

2015 - 2017

Corporate Telephony Consultant

Relate with portfolio/prospect customers, identify sales opportunities for new products and services or upgrades, prospect new business and customers, work in the IT and Telecom segment and map business opportunities.

EDUCATION

2008 - 2015

Law - UFMG

Graduated in Law from the Federal University of Minas Gerais.
